

Datalogic Automation People

Interview to Mauro Sacchetto, new Chief Executive Officer of Datalogic

Mauro Sacchetto, 50 years old, Degree in Physics at the University of Milan (Italy), has recently become the General Manager of Datalogic and since April, Chief Executive Officer. Sacchetto has acquired a vast and deep international experience in multinational companies that operate in Telecommunications, Electronics, Microelectronics and Information Technology, managing companies operating in Europe (Bull Compuprint, Monsanto and Pirelli) and in USA (Intel and Monsanto). Let's get to know the new Chief Executive Officer better through a few questions relative to his few months in the Group.

The new SG-LP

Datalogic Automation is pleased to announce the introduction of the new **LASER POINTER SG-LP** series of Safety Accessories Family. Thanks to its completely new housing and fixing system SG-LP laser pointer can be installed in all safety light curtains profiles of SE, SG2, SG4-B and next SG Body series.

Exactly as the previous model SE-LP, the installation is performed through one of two lateral grooves; but, thanks to a specially designed CAMME fixing equipment the laser pointer can be inserted into the groove either from the top or from the side, depending on which kind of fixing brackets have been used to mount the safety light curtain (standard "L" or TOP-BOTTOM Rotating ones).
